

Britannica LaunchPacks: Science

*Better learning experiences
start with **better content.***

1700+ Packs aligned
to curriculum

Support **STEM**
instruction

Ideal for **Project**
based learning

From nuclear energy to ocean currents, take your science instruction to the next level with **award-winning content packs from Britannica.**

 **Britannica** LAUNCHPACKS™

Everything teachers need to make great teaching easier.

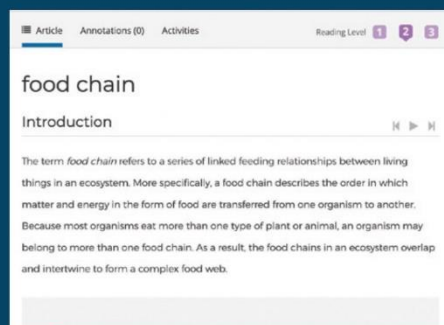

Customise to your liking

Use LaunchPacks right out of the box or customise every Pack to fit. Shorten articles, remove media, annotate text, even add your own materials - you have full control.

Diversify learning pathways

Every curious mind is different. Which is why every Pack lets students choose which themes, subtopics or media types they want to engage with. Students are free to guide their own learning, while teachers can feel confident that it's all aligned to curriculum.

Great content is differentiated content

With up to 3 reading levels, every student can access the same information at a level they're comfortable with. For extra support, built-in tools like read-aloud and translation are just a click away.

Trust the experts

Every LaunchPack is thoughtfully put together by experts, regularly updated and free from bias. We take extra care vetting every piece of content, so you don't have to.

Differentiate

Choose a Pack from four different grade levels

Customise

Edit the contents of a Pack or add your own documents & web links

Scaffold

Add instructions, ready-made activities or a Kahoot! quiz

Share

Assign a Pack to your students using a direct link or via your LMS

Review

Review activity responses to monitor student progress
